**Zero 2016**  
Since last year's PIT Count, Connecticut reached functional zero\* for veterans, including chronically homeless (CH) vets. We hope to reach the same goal for all chronically homeless people by the end of 2016.

\* What does functional zero mean? It means having the systems and resources in place so that when people in the target population (veterans, chronically homeless) are identified, they can be rehoused quickly. It does not mean that no veteran will ever experience homelessness again, or that no one will ever again become chronically homeless.

## Health and Safety

CT PIT collects data on a number of common service needs that are shared by a large proportion of individuals facing homelessness. By using this information about health and safety needs, more targeted interventions that allow a focus on well-being in addition to housing can be developed.
