

Zero: 2016

- Community does not use the VI-SPDAT and has not begun to develop a by-name list

- The entire community uses the VI-SPDAT
- Community has begun to aggregate the names/data from the agencies that use the VI-SPDAT but don't yet have a comprehensive list
- Community has a database to keep track of the names/data from the VI-SPDAT but access is limited to certain parties

- The entire community uses the VI-SPDAT
- Community has aggregated the names / data from the agencies that use the VI-SPDAT and have a comprehensive list
- Community has a database to keep track of the names / data from the VI-SPDAT and access is available to all parties
- Community meets very regularly, to discuss (i.e. case-conference) the by-name list
- Community minimizes duplication of outreach efforts in each geographic area Broader community knows who to contact if they see someone who is homeless

- A portion of the community is using the VI-SPDAT but several or many agencies are not participating
- Only a % of CANS geography covered routinely by outreach workers
- Community has begun to aggregate the names / data from the agencies that use the VI-SPDAT

- The entire community uses the VI-SPDAT
- Community has aggregated the names / data from the agencies that use the VI-SPDAT and are nearing a comprehensive list
- Community has a database to keep track of the names / data from the VI-SPDAT and access is available to all parties
- Community meets every once in a while to discuss (i.e. case-conference) the by-name list
