Why Track COVID Vaccinations?

Actions to Improve Second Dose Follow-Up

Request	Support	Integrate	Conduct
Request updated contact information and alternate ways to reach people	Support safe storage of vaccination cards <ul style="list-style-type: none">• Everyone will receive vaccination cards with the date, type, and location of vaccination	Integrate second dose appointment reminders into routine interactions	Conduct targeted outreach to connect with individuals who could be lost to follow-up

Vaccine Distribution Strategies

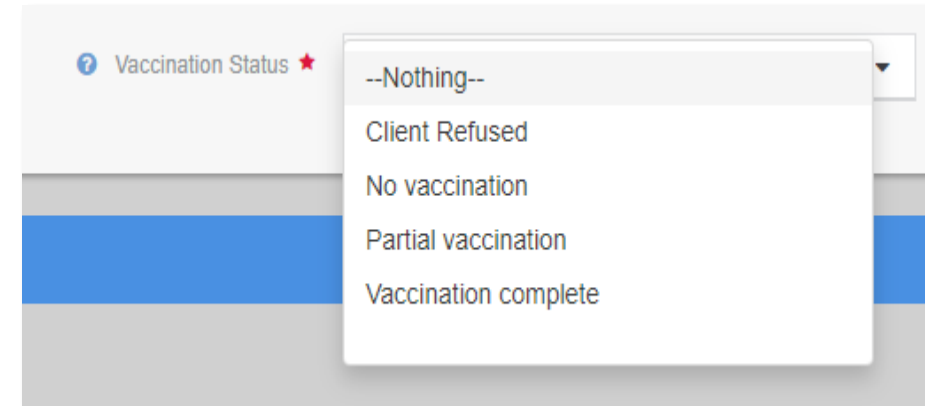

Homeless service providers can support state and local health departments:

- Host on-site vaccination clinics
- Identify venues frequented by people experiencing homelessness
- Guide the development of tailored approaches to reach people you serve

Data Entry Expectations

- If you already have clients who have **already been vaccinated**, manually enter their vaccination data
 - Recommendation: confirm data on CDC vaccination card
- For **clients receiving vaccinations**, enter either scheduled or completed vaccination data
- For each client in your shelter, **enter a vaccination status** (Client Refused, No vaccination, Partial vaccination, Vaccination complete)

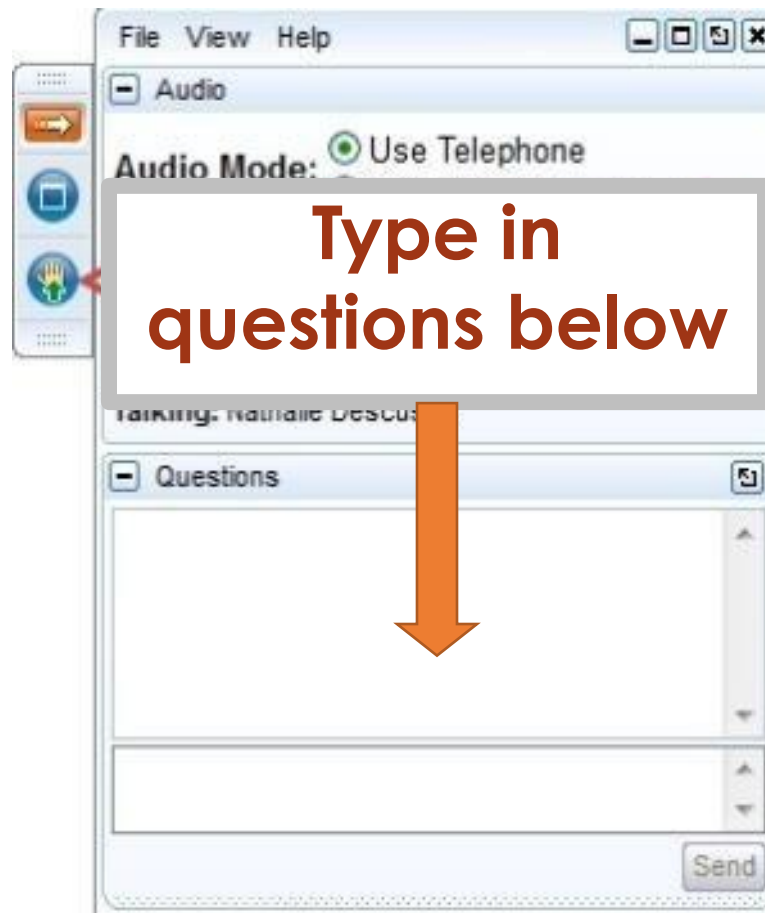

A screenshot of a software interface showing a dropdown menu for 'Vaccination Status'. The menu is open, displaying five options: '--Nothing--', 'Client Refused', 'No vaccination', 'Partial vaccination', and 'Vaccination complete'. The 'Vaccination complete' option is highlighted with a blue background. The label 'Vaccination Status' is accompanied by a question mark icon and a red star icon.
