HMIS Release Notes
Updates to CE Events Workflow – Closed Enrollments

November 18, 2021

What are the changes?

Beginning 11/18/2021 users entering Coordinated Entry Events will be able to select closed enrollments in the "Program Enrollment" Dropdown. Closed enrollments will display beginning and end dates, see screen shot below for examples.

Which users are impacted?

Coordinated Access - Network

How does this help?

The ability to select closed enrollments when entering a Coordinated Entry (CE) Event will better reflect the process that BNL managers use when matching clients with housing.

Typically, a client is exited from their CAN enrollment before they are matched with housing. The BNL manager can now choose a closed CAN enrollment when entering a housing matching CE Event.

When will I see this change in HMIS?

This change is expected to be rolled out on November 18, 2021.
